Marquee Tent construction :

Step 1

To build the site lofting and fixed base according to the specifications of the tent. All the bases must be on a horizontal line, and when the ground is uneven, fill it out first.

Step2

To place the materials in the corresponding position according to the connection relationship and construction position of each part.

Step3

Assemble the frame

1. Ridge connecting Angle and diagonal beam installation
2. Bearing column and diagonal beam installation

Step4

The vertical frame is correctly and safely connected to the inclined beam by the crane through the traction cable.

Step5

The cross strut is first connected to the base, and locked with the cylindrical pin and the cotter pin.

Step6

To install the ridge square pipe. Hang one end of the ridge square pipe with a curved hook into the corresponding U-buckle of the frame, and the other end is the same.

Step7

The roof square pipe installation

Step8

Install the gable center column and side column

Step9

Install the left and right suspension tubes

Step10

Adjust the position and fixing of the center and side column base

Step11

Roof cable installation

Step12

Tarpaulin installation

Step13

Through the side wall, gable tarpaulin under the tension rod

Step14

Complete the tent installation after a comprehensive inspection

Tent setting up

The tent is an important part of the rural wedding scene, and the 10-table banquet rural wedding tent is currently a more popular one. When setting up a tent, pay attention to the following points:

- 1, choose the right tent size, according to the number of guests to choose the right tent size.
- 2, the tent should be firmly built, pay attention to the support structure of the tent is firm, so as to avoid safety problems.
- 3, the decoration of the tent should be beautiful, and it should be decorated according to the preferences and themes of the new couple, so that the whole scene is more beautiful.

Precautions for tent construction:

Before installation, check whether all components are in good condition. During installation, keep non-construction personnel away from the installation site.

1. Measure the site in advance before using the tent, determine the specifications of the tent to be used,
2. The tent needs to be assembled by professionals, and non-professionals must not assemble and build the tent by themselves,
3. Determine the fixing method of the tent according to the construction site (expansion screw fixing, ground nail fixing, bearing plate attaching weight fixing)
