

## Aluminum Structure Warehouse Storage Tent For Industrial Workshop Commercial Storage Tent Manufacturing Companies

### Our Product Introduction

#### Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

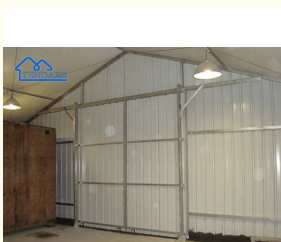

#### Product Specification

- Product Name: Commercial Storage Shelter
- Frame: Aluminium6061/T6
- Fabric Material: Double PVC-coated Fabric,waterproof,fireproof,sunproof
- Color: White,Clear,Green,Blue, Yellow Etc
- Lifespan For Roof And Sidewall: 8-10 Years
- Lifespan For Aluminium: 15-20 Years
- Application: Storage, Event,Wedding,Party,exhibitor,Trade Show
- Highlight: **Commercial Warehouse Storage Tent, Industrial Warehouse Storage Tent, Aluminum industrial warehouse tent**

## Product Description

### Aluminum Structure Warehouse Storage Tent For Industrial Workshop Commercial Storage Tent Manufacturing

#### Companies

#### Description :

product name	Storage Tents
Material	Aluminium6061/T6
Color	White,Clear,Green,Blue, Yellow etc
Function	Easy movable,easy to assemble and disassemble for different event
Usage	Warehouse, Event,Wedding,Party,exhibitor,Trade Show,Banquet, Sports Field,Church,Meeting

#### Our company :

Tendars tecnology co.,Limited specializes in outdoor aluminum alloy tent structure design, quality management, global sales. Satisfaction with our

customers for large wedding tents, party tents, outdoor activities, exhibition tents, sports tents , Logistics storage tents, reception tents, sports event tents, temporary meeting tents, etc., have a wide range of uses to meet the needs of the majority of customer groups. It has been exported to more than 150 countries and regions, and has been unanimously trusted and praised by customers. Our corporate philosophy: adhering to quality and service to accompany you throughout the process, customer satisfaction is our eternal pursuit. Tendars tents continue to innovate and develop and help customers choose the prefabricated aluminum alloy structure building tents that suit the market specifications, and make every detail with the technology of excellence. At the same time, we have many years of experience in import and export of tents and professional engineers to provide solutions.

#### Advantages of warehouse tents:

The main feature of the tent is that it can be dismantled at will, and "go" everywhere with the equipment or needs. And can be based on demand, flexible terrain and space design, size and height tailored, coupled with its own large installation team, can solve all kinds of problems. As an economical and practical storage solution, storage tents also have obvious advantages, in the case of limited budget and cost savings, leasing and even buying are one of the high-quality options for many enterprises.

In order to meet the needs of various industrial logistics warehouses, the storage tent contains ABS wall, glass curtain wall, sandwich panel, steel structure, rolling gate, HVAC and other professional supporting equipment selection to meet the various functional requirements of various storage Spaces. For air conditioning, toilets, lamps, sofas, TV sets and other things, can be installed at will.

In addition, as a representative of environmentally friendly materials, the use of environmentally friendly tents can reduce pollution and damage to the environment. Not only do they use recyclable materials, they also use processes that reduce carbon dioxide emissions, thus reducing energy consumption and carbon emissions. Environmental protection tents can also be coordinated with the natural environment, such as natural ventilation design can be used to reduce reliance on air conditioning, but also through shading and insulation to achieve the purpose of energy saving.

#### How to use the prefabricated canopy to overcome these three problems?

The cost of self-built warehouse mainly has economic and time aspects.

In terms of economy, the investment may be large, and the warehouse, equipment and related tools and other equipment need to be equipped; In terms of time, it is necessary to worry about the problems encountered in delivery, storage capacity and production adjustment. If there is no reasonable planning, it will increase the burden of enterprises, slow down the pace of production, and fail to achieve the purpose of improving economies of scale. In contrast, the use of warehouse tents is much simpler and more convenient: no ground pretreatment is required, and the approval process is simple; Tent materials are processed in the factory, and can be put into use after construction; The construction efficiency is fast, and the construction of about 1,000 square meters can be completed in one night; The economic cost is only 50%-60% of that of brick-concrete buildings of the same size.

The self-built warehouse can effectively avoid some problems such as the expiration of the lease contract and the rise of rent, but it is still inevitable to encounter other risks. Traditional warehouses are put into construction at one time, the use of fixed area, single function, not flexible enough. Too much investment affects cash flow, and it may be vacant if the industry is in the off-season, and it is impossible to migrate. In response to such a situation, the advantages of the modular tent are reflected: the warehouse tent is composed of uniform specifications of the unit components, can be installed or reduced at will to expand and reduce the use of the area; Through the transformation of the wall tarpaulin can flexibly realize the function conversion, such as transforming the warehouse into a production workshop; All parts of the warehouse can be replaced and recycled, and can be relocated as a whole.

Nowadays, warehousing and logistics are becoming more and more intelligent, and some new technologies are also used in the field of warehousing. At this time, if you want to upgrade the warehouse and do fine management. Whether effective late expansion can be carried out is also a problem. Some warehouses are built early, often do not take into account the later needs to change, if you want to upgrade, it also needs to spend a lot of time, manpower and money to transform. Using our warehouse canopy is much easier and more convenient. As a platform, the prefabricated warehouse tent can be widely compatible with different walls (glass wall, sandwich cotton, color steel plate, ABS wall, etc.), heating and cooling facilities, temperature control system, phototypeset facilities, fire fighting facilities, security facilities, digital management system, etc. The upgrade and expansion only need to replace the corresponding parts to complete, and will not produce construction waste and decoration pollution caused by the shutdown of storage use. The aluminum alloy frame of the warehouse canopy has a design life of twenty years, and the minimum usable temperature can reach minus twenty degrees, which meets all the functional requirements of the traditional warehouse and can be used semi-permanently.

#### FAQ :

##### 1. Are you a trading company or manufacturer?

We are manufacturer, so we can give you competitive prices.

##### 2. What about your MOQ - minimum order quantity ?

1 SET

##### 3. Can you customized?

Yes, please offer your drawing with technical requirements.

##### 4. Do you Accept OEM service?

YES!

##### 5. What's your Delivery Time?

15-30 days, please confirm with us before order!

##### 6. How you pack products?

Aluminum frame packed in air bubble film, roof and sidewall in professional PVC carry bag.
