Sunshade spherical tent :

For different crops, the environment required is very different. The greenhouse spherical tent is mainly designed and developed based on the need for heat preservation, and the sunshade spherical tent is for the purpose of cooling.

The grid cloth with a small weight is used as the covering, which has the effect of ventilation and shading, so as to avoid the direct sunlight on the crops. Black grid tarpaulin has excellent sunshade absorption performance, but also has the advantages of anti-ultraviolet, anti-aging, anti-wind and so on.

The use of such a sunshade net spherical tent in agricultural production is not only beautiful and practical, but also more safe and reliable. Agricultural spherical tent is the future agricultural development trend of agricultural upgrading and business model innovation, and it is a feasible measure to achieve agricultural modernization and fine management.

Agricultural spherical tent has practical, aesthetic, environmental protection and other advantages, the traditional agricultural production into a pastoral landscape art, the primary industry effectively into the three industries, to achieve the added value of agricultural products to enhance the socialization of agriculture, modernization and diversification.
