How to choose cost-effective outdoor spherical tent?

First, according to the style of the purchase of tents a lot of styles, can be roughly divided into spherical aluminum alloy tents, inflatable bubble tents, PVC plastic tents, etc., different styles of tents, characteristics are different, according to the actual use of the situation to choose

Second, according to the use of the size of the purchase if you want to use in their own villa garden or roof balcony, You can choose the corresponding tent according to the placement area of your garden and the number of people to accommodate, the conventional tent size is 3.6 meters in diameter, or if you want to use it for commercial complexes, or camp homesays, you can choose to customize it, but the amount should be enough.

Third, according to the characteristics of the product, the service life of the tent made of PVC material is certainly better than the tent made of PC sheet material, the quality of the tent material is different, its service life is different, which is why the same type of tent on the market, some prices are high, some prices are low can also be bought, so it is recommended that when choosing a tent, Try to put the quality of the tent products in the key consideration position, followed by the price, so as to buy a cost-effective tent.

The above is about how to choose cost-effective outdoor spherical tent related introduction, in short, outdoor spherical tent purchase is different from other products, outdoor tent is a very high use of a product in the outdoors, and the use period is relatively long, the safety of the tent is very important, to consider the use of the tent function, safety performance and other situations, choose the right tent.

FAQ :

Q: What kinds of tent can you produce?
