Fabric Color	White, Red, Green, Clear or Customized Color
Side Wall	PVC Walls, Glass Walls and etc
Wind Resistance	100km/h
Fixing Solution	Expansion Bolts, Tent Pegs, Weight Plate
Temperature Resistance	-30 degree Celsius to +70 degree Celsius
Flame Retardant	DIN4102, B1, M2
MOQ	1 Set
Sample	Provide After Negotiation

Badminton sports tent price:

According to the length, width and height of badminton sports tent and configuration requirements (side wall material: PVC tarpaulin, ABS plate, color steel plate, etc.) and wind resistance and snow requirements (wind 10, 12, 14) and the appearance of the tent requirements (miter top, curved top, folded line, combined type, etc.), only for the tent we will calculate the price according to this comprehensive one to one, the price of the conventional badminton tent is 300-600 square/yuan.

Specific or to our sales staff according to everyone's requirements for calculation.

As we all know, the specification of the badminton sports tent is a rectangular court with a length of 13.40 meters, the width of the doubles court is 6.10 meters, and the width of the singles court is 5.18 meters.

The width of each line on the court is 4 cm, the space above the whole court is low of 9 meters, and the width of the sports tents received since our establishment in 2013 is from 15 meters, because we want to use this kind of tents are matched with the badminton sports tents, the whole is a comprehensive sports venues, divided into a badminton sports tents inside.

In addition to the price of the badminton sports tent, I also want to remind you to choose the material of the tent, that is, the safety part of the same aluminum alloy frame, the model is not the same, the wind resistance and snow resistance are not the same, and the price of each newspaper is not the same. If you want to find a strong and reliable tent manufacturers

About sport tent structure :

The canopy consists of two parts: gold frame structure and tarpaulin. At present, the hardness and service life of aluminum alloy materials are much higher than the previous steel structure, especially its wind resistance can generally resist 8 strong winds, and the snow carrying capacity of the tent is also between 50-20cm.

Tarpaulin plays a very important role in our tent construction. The tarpaulin is made of synthetic fiber cloth with double-sided PVC coating, which has long-lasting bonding properties. The scraper coating technology uses the physical and chemical bonding of liquid PVC and fiber to apply paste directly on the fabric. Strong welding performance: the welded fabric can withstand great tension, even in harsh environments such as hurricanes and frequent operations, it will not affect the sealing degree of the welding;

Durable service life: a certain thickness not only gives the blade coating fabric good UV resistance, but also extends the service life of the product;

Good color fastness: Because the pigment is directly immersed in the PVC coating, the razor coated fabric can maintain the color as new as ever. Anti-corrosion, anti-mildew, anti-ultraviolet, flame retardant (M2, B1) and other properties have reached international standards.

In addition to providing large German indoor basketball tent sports space, we also provide multi-functional areas including viewing area, security check, reception, rest area, dining area, etc., to provide you with a one-stop solution, please consult our 24-hour service hotline for specific details, we will provide you with one-on-one service according to your needs and use area!

FAQ :

Q1.Does your company accept customized tent?

A:Yes, we can make the tent according to our customers different need.

Q2.Does your company is a factory?

A:Yes, we are a factory, so our price is really reasonable, but with high quality.

Q3. Does your company provide any help to install the tent?

A:Yes, usually we will send manul instruction and CD to help our customers to install the tent.

Q4. Does your tent can move to the other place after set up?

A:Yes, the main frame of our tent is aluminum, so it is light in weight but with high strength, that is very easy to set up and dismantle.
