

Custom Aluminum Stage Truss Length 1500mm Size 100mm For Event

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

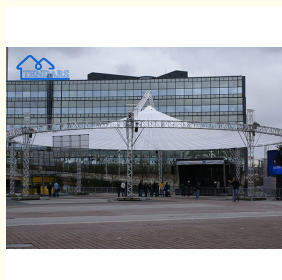

Product Specification

- Product Name: Custom Aluminum Stage Truss
- Main Tube Diameter: 20mm
- Main Tube Thickness: 2mm
- Length: 0.5m Or As Your Request
- Braces Diameter: 5mm Full
- Braces Thicknes: 5mm Full
- OEM & ODM: Avaliable
- Usage: For Hotel Decorative
- Highlight: Custom Aluminum Stage Truss, Aluminum Stage Truss Length 1500mm

Product Description

Available OEM & ODM Custom Aluminum Stage Truss Length 1500mm Truss Size 100mm For Event

Product Description:

Section type	Square
Size	100*100mm
Material	Aluminum 6082-T6
Main tubes	Ø20×2mm
Braces	Ø5mm full
Length	0.5-3m or customized

Product details:

1. Widely used in market for hanging LED screen, lights and speakers, tent support, they can used in show, exhibition, performance, advertisement, outdoor celebration and so on.
2. Compactness
3. Easy of assembly with the box corner system
4. Popular & fashionable
5. Firm & durable
6. We are professional manufacturer of truss, making-up, setting-up, according to your desire, we can design the most suitable exhibition truss for you.

Material Analysis(Aluminum Alloy)

Raw material is a precipitation hardening aluminum alloy, containing magnesium and silicon as its major alloying elements. It has good mechanical properties, exhibits good weldability. It also has good effect of proof stress, corrosion resistance, and oxidation.

The advantages of custom aluminum stage truss include:

Tailored to Specific Needs: Custom aluminum stage truss can be designed and fabricated to meet specific requirements, including size, shape, load capacity, and configuration. This ensures that the truss system fits the exact specifications of the event or venue.

Optimized Performance: Custom truss systems can be engineered to optimize performance based on the intended use and load requirements. Engineers can design the truss structure to withstand heavy loads, high winds, and other environmental factors while ensuring safety and stability.

Enhanced Aesthetics: Custom aluminum stage truss can be designed with unique shapes, curves, and configurations to create visually stunning stage setups. Custom finishes, colors, and lighting effects can also be incorporated to match the theme or branding of the event.

Improved Functionality: Custom truss systems can be tailored to include additional features and accessories to enhance functionality. This may include integrated rigging points, motorized hoists, cable management systems, and more, providing greater versatility and convenience.

Seamless Integration: Custom truss systems can be seamlessly integrated with other stage elements, such as lighting fixtures, audio equipment, video screens, and banners. This ensures a cohesive and professional-looking stage setup that meets the needs of the event.

Efficient Use of Space: Custom aluminum stage truss can be designed to maximize the use of available space, whether it's a small indoor venue or a large outdoor stage. The truss system can be configured to fit within the available footprint while still providing ample rigging and mounting options.

Durability and Longevity: Aluminum truss is known for its lightweight yet durable construction, making it ideal for use in demanding live event environments. Custom truss systems are built to withstand repeated assembly, disassembly, and transportation, ensuring long-term durability and reliability.

Safety Compliance: Custom truss systems are designed and fabricated to meet industry safety standards and regulations. This ensures that the truss structure can safely support the intended load and withstand various stress factors, minimizing the risk of accidents or structural failures.

Brand Enhancement: Custom aluminum stage truss can be customized with branding elements, such as logos, graphics, and colors, to promote sponsors or enhance the event's branding. This can help increase brand visibility and recognition among event attendees.

Professional Support: When working with a reputable truss manufacturer or supplier, custom aluminum stage truss comes with professional support throughout the design, fabrication, and installation process. This ensures that the final product meets the client's expectations and performs flawlessly during the event.

The advantage of us

1. We will provide the free service on 24 hours.
2. We have a complete QC system, and regularly the quality on 24 hours.
3. We have a specialized foreign trade team, and can provide the professional service.
4. We have several sets of production equipments, can meet your delivery time in time.
5. We are factory, and can provide the cheap price for you.

FQA:

(1) Q: How do I know your quality? Do you support sample order?

A: High resolution detailed photos and sample will be able to verify our quality. You can get free sample. In our next order we will return sample fee to you.

(2) Q: Which kind of payment methods you'll accept?

A: We accept T/T, Western Union, Trade Assurance, Paypal.

(3) Q: Do you have any certification?

A: Yes. Our goods have passed loading tests and we have got CE certifications. If you need we can send copy certification to you for reference.

(4) Q: How can I visit your company? Do you have a warranty time for your products?

A: We can pick you up to our factory in any time. Warmly welcome you to visit us! Yes, 5 years warranty, we'll free to send you the same products if our products are non-artificially damaged in its warranty time in our next order.

(5) Q: Can you do customized design?

A: Yes, we can. We have a professional engineer team and can do any design that you can offer.
