Dimensions	0.50M
ODM	YES
OEM	YES

Item	Value
Place of Origin	China
Length	0.5/1/2/3/4m
Material	Aluminum Alloy 6061-T6
Warranty	2 Years

#### Features:

**Material Composition:** Aluminum steel display truss is typically constructed using a combination of aluminum and steel components. The aluminum provides lightweight properties, making the truss easy to transport and set up, while the steel adds strength and durability.

**Modular Design:** The truss system consists of modular components that can be easily assembled and disassembled without the need for specialized tools. This modular design allows for quick setup and customization of booth layouts to accommodate different exhibition spaces and requirements.

**Versatility:** Aluminum steel display truss can be configured into various shapes and sizes to create custom booth designs and structures. It can be used to build walls, arches, towers, entrances, and other architectural elements to attract attention and showcase products or services effectively.

**Strength and Stability:** Despite its lightweight nature, aluminum steel display truss offers excellent strength and stability to support lighting fixtures, signage, banners, product displays, and other promotional materials. The steel reinforcement ensures that the truss can withstand heavy loads and remain sturdy throughout the event.

**Compatibility:** Aluminum steel display truss is compatible with a wide range of accessories, including shelves, counters, monitors, graphics panels, and lighting systems. This compatibility allows exhibitors to integrate various elements into their booth design to create engaging and interactive displays.

**Portability:** Aluminum steel display truss is designed for portability, making it easy to transport between different event venues. The lightweight construction and compact packaging ensure convenient storage and transportation, reducing logistical challenges for exhibitors.
