Installation	Easy to be assembled and dismantled, movable. No pole inside, tent space can be 100% utilized.
Space	No pole inside the tent,100% available interior space

Standard Size Available:

Size(m)	Side Hight(m)	Top Height(m)	Frame Size(mm)	Length(m)
5	2.5	3.28	48*84*3	customized
10	2.5	4.12	122*68*3	customized
12	3	4.87	122*68*3	customized
15	3	5.18	166*88*3	customized
20	3	5.84	112*203*4	customized
25	4	7.71	112*203*4	customized
30	4	8.46	120*254*4	customized
50	4	14.75	120*400*5	customized

The primary materials:

Frame: The frame of the tent is usually made of lightweight yet sturdy materials such as aluminum or steel. Aluminum frames are preferred for their corrosion resistance, lightweight nature, and ease of assembly. Steel frames offer greater strength and durability but are heavier.

Fabric: The fabric used for the canopy of transparent sports hall tents is often a high-quality PVC (polyvinyl chloride) or PE (polyethylene) material. These fabrics are treated to be transparent, allowing natural light to enter the tent while providing protection from UV rays and weather elements. They are also waterproof, flame-retardant, and resistant to tearing and punctures.

Transparent Panels: Transparent sports hall tents feature clear or translucent PVC panels integrated into the canopy to provide natural light and visibility inside the tent. These panels are usually made of high-grade PVC material that is durable, UV-resistant, and easy to clean.

Anchoring System: The tent's anchoring system includes stakes, anchors, or weights that secure the tent to the ground and provide stability during use. Depending on the installation location, various anchoring methods may be employed to ensure the tent remains secure in windy conditions.

Connectors and Fittings: Connectors and fittings are essential components that join the frame elements together and provide structural integrity to the tent. These components are typically made of durable materials such as aluminum or steel and are designed to withstand the forces exerted on the tent.

Optional Features: Depending on the specific requirements of the sports event, transparent sports hall tents may include optional features such as flooring systems, HVAC (heating, ventilation, and air conditioning) units, lighting systems, branding/logo printing, and spectator seating areas.

Packaging & Shipping

All steel structure should packing by air bubble filmplastic protect, because the steel structure easily scratches without protection packing.

All fabric should packing by palstic bag , protect cleaning.

Steel structure loading by top open container. lightly and slowly hang into container.

FQA:

1. Can you print our logos on tent ?

Yes. Customized logos can be print on the tent fabric according to your requirements.

2. Is that factory price?

Yes. We assure you all prices are factory price.

3. Is your tent strong and stable enough ? How about the wind loading ?

Yes, It is can resist wind up to 100 km/hr, if the wind or snow is very very heavy, please tell us and we will strengthen the tent to keep you safe!
