

## Easy To Install, Hot Selling Aluminum Stage Lighting Trusses In Chinese Factories

Our Product Introduction

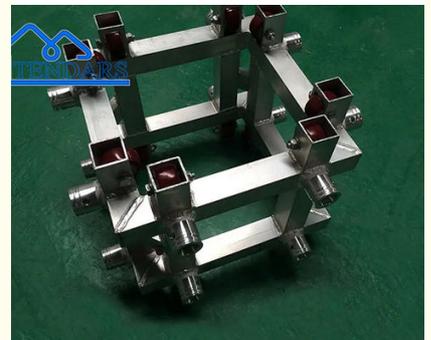

### Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

### Product Specification

- Product Name: Aluminum Stage Lighting Trusses
- Application: Various Activities, Celebrations, Concerts, Exhibitions
- Material: Aluminum Alloy 6061-T6/6082-T6&plywood
- Color: Silver, Black Or Custom
- Shape: Square, Triangle, Circle Or Customized
- Size: 0.5m, 1m, 2m, 3m,or Customized
- Usage: LED Light And Audio Display
- Feature: Portable Installation, Simple And Removable

## Product Description

### Easy To Install, Hot Selling Aluminum Stage Lighting Trusses In Chinese Factories

#### Product Description:

Truss Material	Aluminum alloy 6082-T6 6061-T6
Light duty truss	200*200mm 250*250mm
Medium duty truss	300*300mm 350*350mm 300*400mm 400*400mm 400*600mm
Heavy duty truss	520*760mm 600*760mm 600*1000mm 400*600mm
Main tube thickness	30*2mm 50*3mm 50*4mm
Vice tube thickness	25*2mm 30*2mm 40*2mm 50*2mm
Brace tube thickness	15*1.5mm 25*2mm 30*2mm
Length	0.5m/ 1m/ 1.5m/ 2m/ 3m/ 4m or custom size
Truss type	Spigot or bolt
Truss Shape	Ladder truss, triangular truss, square truss, arch truss, circle truss
Delivery Time	20 working days

#### Application:

**Stage Lighting:** Aluminum trusses are frequently used to support stage lighting fixtures, such as PAR cans, moving heads, spotlights, and wash lights. They provide a secure and elevated platform for mounting lighting equipment, allowing for optimal coverage and visibility during performances, concerts, and theatrical productions.

**Concerts and Music Festivals:** Aluminum trusses are widely utilized in concert and music festival settings to create elaborate stage setups and lighting rigs. They can be configured into various shapes and configurations to accommodate different stage designs and production requirements. Trusses are often suspended above the stage or audience area to support an array of lighting, audio, and video equipment.

**Exhibits and Trade Shows:** Aluminum trusses are popular for creating exhibit booths, trade show displays, and product showcases. They offer a sleek and professional appearance while providing structural support for hanging banners, signage, monitors, and promotional materials. Trusses can be customized to fit specific booth sizes and layouts, allowing exhibitors to create eye-catching presentations that attract attention and engage attendees.

**Outdoor Events and Festivals:** Aluminum trusses are suitable for outdoor events and festivals, where they can be used to construct temporary stages, sound towers, lighting towers, and canopy structures. Their corrosion-resistant properties make them ideal for outdoor use in various weather conditions. Trusses can be assembled quickly and efficiently, making them a practical solution for temporary installations at outdoor venues, parks, and fairgrounds.

**Corporate Events and Presentations:** Aluminum trusses are utilized in corporate events, conferences, and presentations to enhance the visual impact and professionalism of the stage setup. They can be configured to create backdrops, arches, and branded structures that reinforce the company's identity and messaging. Trusses also offer flexibility for incorporating lighting effects, projection screens, and audiovisual elements to support presentations and keynote speeches.

**Film and Television Production:** Aluminum trusses play a crucial role in film and television production sets by providing support for lighting, cameras, rigging equipment, and scenic elements. They are used to create overhead grids for suspending lighting fixtures and rigging hardware, allowing for precise control of lighting and camera angles. Trusses are also utilized in green screen studios and sound stages to create modular sets and backgrounds for filming.

#### FQA:

##### 1. Are you a factory or trading company?

We are a factory.

##### 2.What are your payment terms?

We accept Western Union ,telegraphic transfer, 30% of invoice value as down payment,70% balance before shipment.
