| Wind Load | 100KM/H |
| Snow Load | 75KG/SQM |
| Feature | Flame Retardant/UV-resistant/Water Proof |

Details:

Key Features:

Curved Roof Design: Curve temporary storage marquee tents feature a curved roof design that not only enhances the tent's visual appeal but also provides several practical benefits. The curved roof allows for efficient water runoff, minimizing the risk of water pooling and ensuring optimal weather resistance.

Ample Storage Space: Despite their compact footprint, curve temporary storage marquee tents offer generous storage space for a variety of items, equipment, and materials. The absence of interior support columns or poles maximizes usable storage space and facilitates easy access to stored items.

Durable Construction: These tents are constructed with high-quality materials to ensure durability and longevity. The frame is typically made of sturdy materials such as galvanized steel or aluminum, while the cover is made of heavy-duty fabric such as PVC or polyester, offering resistance to weather elements and UV rays.

Quick Assembly: Curve temporary storage marquee tents are designed for quick and easy assembly, with pre-fabricated components that can be assembled on-site using basic tools and minimal labor. This allows for rapid deployment of storage facilities, minimizing downtime and maximizing productivity.

Weather Resistance: The weather-resistant fabric cover and sturdy frame of curve temporary storage marquee tents provide reliable protection for stored items, ensuring they remain safe and secure in any weather conditions, including rain, wind, snow, and sun exposure.

Versatility: These tents are versatile structures that can be used for a wide range of temporary storage applications, including warehouse overflow, event storage, construction site storage, agricultural storage, retail inventory storage, and more. They can also serve as temporary workshops or shelter for outdoor events.

FAQ :

Q: Can you print our logos on the tent?

Yes. Customized logos can be printed on the canvas according to your requirements. Please kindly to provide me the size of your logo first.

Q: Is your tent strong and stable enough? How about the wind loading?

Yes. The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6). So our tent structure is safe and strong and can resist wind speed up to 120 km/hr.

Q: How long is the warranty period?

Guarantee one year. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem. Not including man-made damage or accident damage please.

Q: Can your company send supervision for the installation of the tent?

Yes, we can. Our engineer will supervise the installation. Please notice our customers should pay for it fares and hotel expenses restaurant bills.
