Finish	1. Powder coating
	2. Anodized
	3. Electrophoresis
	4. Wood grain
Color	Dark grey or wooden color
MOQ	1 SET
Lead time	20-35 working days

Advantage:

Advantage 1: small footprint

The great thing about having a yard is that you can change it to your liking. The spherical sun room covers a small area, ranging from 2.5 meters to 6 meters in diameter, and the smaller one is more suitable for the gathering of three or two friends.

If there are more members in the family, choose a larger area, which can also be put down. Save the space, plant plants, or do some design, the whole yard is full of design and fireworks.

Advantage 2: strong practicality

Traditional sunrooms can only partially open the Windows, and in the summer, it is so hot that people do not want to enter. This spherical sun room fundamentally solves this pain point. It is a typical telescopic sun room, except for the frame support, the rest of the space can be opened directly, and can be used as a small terrace in summer.

The interior of the sun room can also be designed HVAC system, plus a layer of thermal insulation board, sitting inside in winter, warm and comfortable. So warm in winter and cool in summer, but also can shade the sun room, not in the yard a real pity!

Advantage 3: not easy to accumulate water

The most worrying thing about the flat-top sun room is the drainage problem, especially where there is a lot of rain, it is often necessary to clean up the sun room, otherwise it is easy to produce garbage, and serious corrosion of the outer frame.

FAQ:

Q: How Can I trust your company?

We are a 10 years experience on tents, you can visit us anytime. We are the certificated supplier .

Q: What is your manufacture time?

Normally 25-40 days depends upon deposit received and drawing, depends on different designs and materials.
